Thank you, Dan. I think we recently received this from the registrant last week for the conference call, but since EFED wasn't on line for the call, we didn't discuss it. The question, which may be for EFED – **Ex. 5 Deliberative Process (DP)**

Debra

Marion – Debra - -just passing this along concerning aldicarb. Amy is the SLA person from Florida and I know her from section 18 work and such.

Earlier today, Amy reached out to express that Florida is closely tracking the PRIA for aldicarb-citrus and is interested in assisting – if we have need for that or technical questions. She was signaling this from the standpoint of supporting our science – and made clear to me she/her office recognizes there are some important risk issues to consider. Attached too – is a state rule they have on aldicarb and I felt it might be interesting to look at in the context of the proposed label or mitigation options.

Thanks
